

The background of the top half of the page is a photograph of a modern conference room. It features a large, light-colored oval table surrounded by several grey office chairs. Large windows with horizontal blinds are on the right wall, and a whiteboard is on the left. A small, dark, dome-shaped microphone is mounted on the ceiling. The text "CeilingMIC Overhead Microphones" is overlaid on the bottom left of this image in a large, blue, sans-serif font.

CeilingMIC

Overhead Microphones

Superior Audio Quality

CeilingMIC™ microphones deliver professional audio quality into your PC system for a superior conferencing experience. These overhead microphones are a more economical alternative to a custom installation. Compared to table microphones, ceiling-mounted microphones eliminate table clutter, creating a clean look in your conference room or meeting space.

- Works with Vaddio products designed with an EasyMIC port (AV Bridge MATRIX PRO, ConferenceSHOT AV Cameras, EasyUSB MicPOD I/O, EasyUSB Mixer/Amp)
- Three element array head with LED mute status indicator
- Full 360-degree pickup coverage
- Supports both reference and non-referenced AEC
- Ideal for drop tile ceilings and open-ceiling environments as well

Each CeilingMIC unit delivers the performance of three microphone elements built into a single pendant hanging enclosure. Each unidirectional cardioid microphone element is equipped with integrated echo cancellation and Digital Signal Processing (DSP), including equalization, filtering and automatic gain control (AGC). The DSP in the interface box provides AEC reference from far end and applies it to individual mic elements, so conference calls are crystal clear on both ends of the conversation.

With its plug-and-play design, installation is as simple as connecting a Cat-5 cable between the EasyMIC ports and the CeilingMIC microphone interface box. Power, control and audio are all incorporated into the single cable. The CeilingMIC supports lengths of up to 100 feet (30 meters) of Cat-5 cable between its interface box and EasyMIC ports. In addition, its lightweight, simplified ceiling box means faster, easier installations.

The CeilingMIC pendant includes a 36-inch (91 cm) adjustable drop cable and with a standard RJ45 jack connection, the pendant can be extended to a total length of 15 feet (5 meters) from the interface box.
